

SOUTH CAROLINA
STATE FIRE

South Carolina State NFIRS Program Research and Development

Let us help you with your local fire problem!

How long does it take for you to respond to the edge of your district? Do you know if you have a firebug problem? How much property did you save last year from fires?

If your district has NFIRS data, or if you want assistance collecting your own data, we can help! Every decision you make can be backed up with data and statistics, and the best part is that it's all free! Contact us with your questions – we can provide raw data, tables, graphs, charts, maps, or in-depth analysis of your data as you need it. We can also show you how to process and analyze your own data.

Solving your local fire problem is just a few clicks away!

Want to be on the forefront of fire research?

Fire departments that want to be connected to their community will want to be a part of the research opportunities available out of our office. Check out our website to see what opportunities are available for you!

Why do you want to be a part of it?

Departments who participate in statewide research will be the first to have **resources** that are created/developed/obtained as a result of this project. Additionally, your department will have some great **media coverage** because you are assisting your community in solving their problems. Finally, should this research be **published**, your department will be acknowledged with gratitude for your contributions.
